

Buffalo Hearing & Speech Center **Bhsc** Sound Answers

A Not-For-Profit organization helping children and adults listen, learn, and communicate since 1953

Presents

“What’s New in Tinnitus Management?”

A *free* educational seminar to **Ask the Experts!**
(Open to the Public)

Tinnitus is usually described as a ringing in the ear, but it can be any type of sound including hissing, ringing clicking or roaring. It impacts 50 million people in the United States to varying degrees and can be either in one or both ears.

Have you wondered?

- *Why are my ears ringing?*
- *Is there anything that I can do to help the ringing stop?*
- *There are so many products that say they will help my tinnitus. How do I know what to believe?*

Seating is limited so please call for dates and to register
