Micro-CIC® (Completely-In-The-Canal)
- Smallest, custom-designed, deep fitting hearing aid
- Nearly invisible
- Appropriate for mild to moderate losses

ITC (In-The-Canal)
- Smaller and more discrete than ITE style aids
- Offers additional user control functions
- Appropriate for mild to moderate losses

ITE (In-The-Ear)
- More visible in the ear
- Features the widest user control functions
- Appropriate for mild to severe losses

BTE (Behind-The-Ear)
- Fits behind the ear and is secured/attached in the ear with a custom earmold
- Offers user control functions
- Appropriate for mild to profound losses

Open Fit RITE/BTE
- Sleek and ultra thin BTE style having nearly invisible tubing
- Significantly reduces occlusion effect (plugged up feeling)
- Appropriate for mild to moderate, high frequency losses

Hearing Aid Options
- Complete Hearing Evaluation
  Determines the degree and type of hearing loss
- Impedance and Imittance Testing
  Evaluates middle ear structure for eardrum abnormalities, Eustachian tube dysfunction, middle ear effusion (fluid), otosclerosis
- Video Otoscopy
  Examines outer ear and eardrum
- Otoacoustic Emission Testing (OAE)
  Evaluates outer hair cell function/inner ear
- Auditory Brainstem Response Testing (ABR)
  Evaluates acoustic/eighth nerve function
- ENG/VNG Testing
  Test battery for dizziness, vertigo and BPPV
- Hearing Aid Consultations, Orientation & Fitting
  Matching hearing aid styles, features and technology to lifestyle and budget
- Speech Mapping & Speech in Noise Testing
  Verifies hearing aid performance in quiet and noise for best real world hearing aid results
- Industrial Hearing Testing
  Baseline and Annual Testing with Analysis
- Custom Earmolds
  - Hearing aids
  - Swim plugs
  - Noise protection
  - Musician earplugs

Ear Disorders and Treatment
- Painless cerumen removal
- Recurrent ear infections, eustachian tube dysfunction
- Chronic otitis media (ear tubes, tympanoplasty, mastoidectomy)
- Hearing loss, tinnitus
- Cosmetic ear surgery
- Treatment for dizziness, vertigo, BPPV

Nose/Nasal/Sinus Disorders and Treatment
- Sinus, chronic and recurrent sinusitis
- Chronic nasal obstruction: septoplasty, functional rhinoplasty, turbinate surgery
- Balloon sinuplasty and FESS
- Allergies
- Treatment for nasal trauma
- Nasal polyps
- Epistaxis (nosebleeds)

Cadillac ENT and Facial Plastic Surgery specializes in the treatment of ear, nose, throat and head and neck disorders, facial plastic surgery with a strong emphasis toward sinus disorders and skin cancer lesion removal. We have superior training and experience in treating both adult and pediatric ENT conditions. Thank you for selecting Cadillac ENT and Facial Plastic Surgery.

Optimum hearing and understanding is vital to our communication, health and quality of life. When hearing aids are the recommended option, our professional staff matches the features and benefits of style and technology to your lifestyle and budget. We recognize that "one size does not fit all" and maintain a variety of hearing aid manufacturers to select for your needs.
