

6-3-2013

My husband has struggled with increasing hearing loss for many years, relying on me to translate for him. One day he realized that he couldn't understand a dr's assistant who was wearing a mask and admitted he needed help.

Dr. Nancy Richman has produced a major life change for my husband and myself. He now hears music in ways he's never really heard before, and I find myself finally asking to have the tv turned up instead of having a headache from how loud it is.

Dr. Richman tested my husband and produced exactly the right devices tuned exactly right for him. I am so pleased with the results and absolutely recommend her. Its truly a life changing experience.

B.M.
