

Compared to some
my hearing loss could be
considered small, but I
did experience some loss.
It happened so gradually
that my family was more
aware of it than I, and
it took some convincing on
their part to have it
checked. My husband
insisted we have a
professional check my
hearing, and his research
led us to Dr. Richman.
What a joy to find someone
warm and caring who
listened to me and
discovered my need, and
what a great moment
when I began to hear
what I had been missing.
I now feel that at some
point in everyone's life
their hearing should be
tested and evaluated by
a professional like Dr.
Richman, and I am so
grateful for her kindness
and caring. Thank
you Doctor and my
family thanks you too!

Gratefully
Gda A.
